*Comfortable, modular housing for the construction site*

# PRECONSU CABINS

Comfortable building .....	<b>4</b>
Advantages .....	<b>6</b>
Comfort sets .....	<b>10</b>
More than just cabins .....	<b>22</b>

## **BUILD FROM A COMFORTABLE OFFICE**

Preconsu cabins are the best choice as temporary housing for construction sites. They are fully equipped and guaranteed to provide a comfortable (temporary) workplace. Due to the modular construction, we can provide a suitable set for every situation. We give advice and provide assembly and transport. This way you are completely relieved!

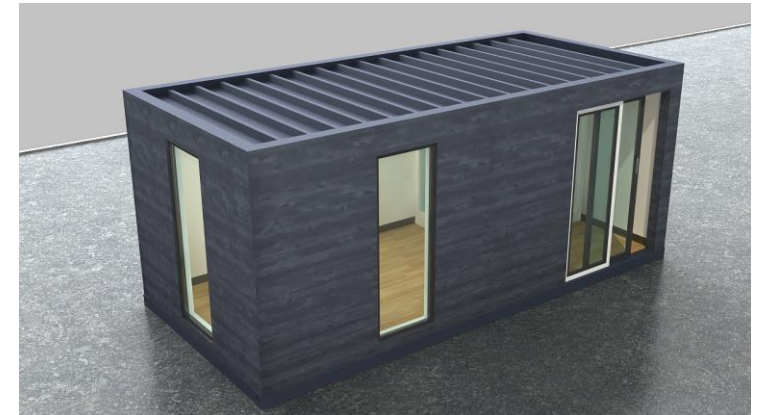

## PLEASANT WORKING ENVIRONMENT

With the latest conveniences, your employees are assured a comfortable workplace. Our cabins are standard equipped with LED lighting, air conditioning and good insulation, among other things, so you have little to no noise disturbance. We also offer the possibility to expand the cabins with, for example, air conditioning or height-adjustable desks. In this way, we provide a pleasant working environment to keep your employees happy.

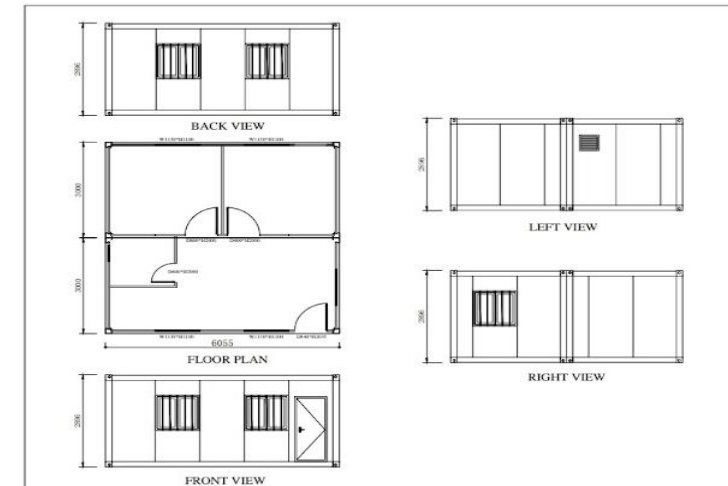

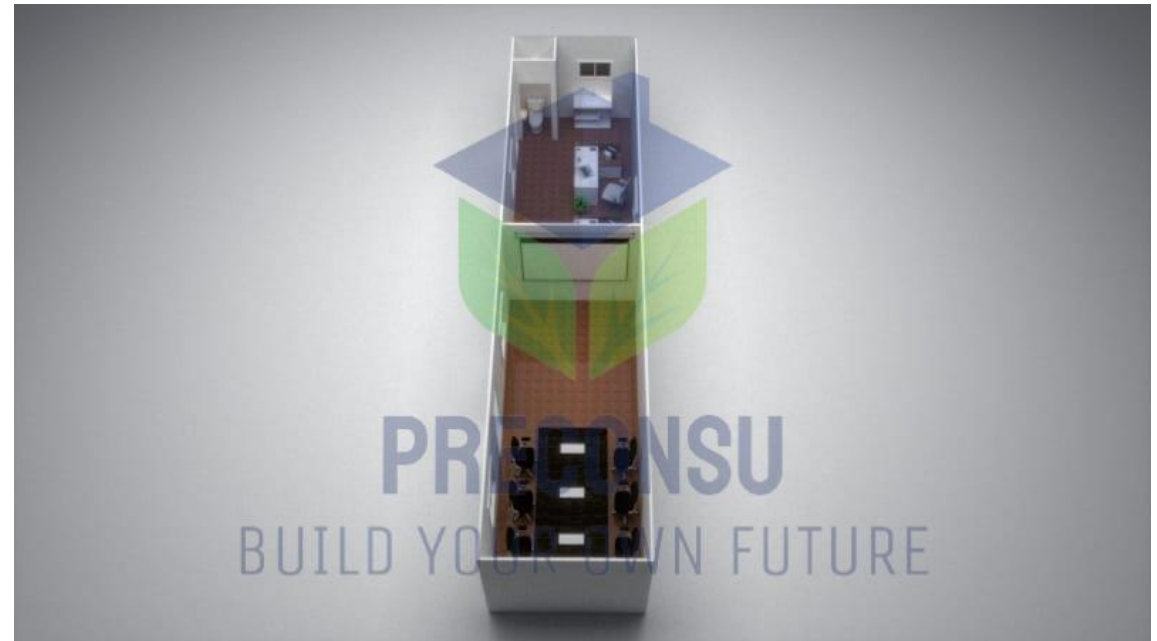

## RECOGNIZABLE & SUSTAINABLE

- Stackable up to 3 high because space is limited on construction sites.
- In your style: colored panels and frames.
- Sustainable: solar panels on the roof.
- Earthmoving.
- Technical drawing.

# COMFORT CABINS FOR RENT

## COMFORT CABINS FOR TEMPORARY STAY

To make it easy for you, we have already put together a number of configurations. We call these comfort sets. These can be equipped with furniture and all accessories needed depending on the number of people on your construction project.

**PRECONSU**  
BUILD YOUR OWN FUTURE

## MORE THAN JUST CABINS

In addition to renting temporary housing, Preconsu also offers the total solution for your construction site. For example, Preconsu consists of a team of specialists who can advise you in your choice of construction site equipment, and much more. Thus, we provide your construction site with a practical and efficient prefabricated structure.

**PRECONSU**

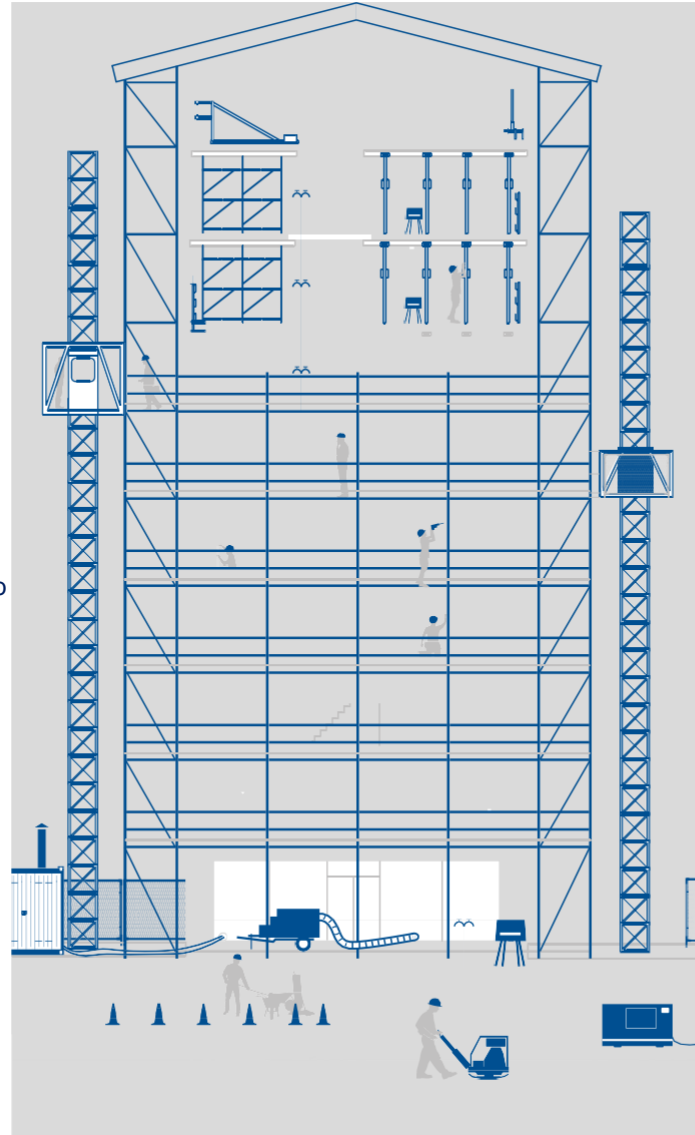

BUILD YOUR OWN FUTURE

Preconsu Foundation is a Green investment foundation, which has grown from 8 years of medium voltage history (AIM Industrial Solutions N.V), but is looking to the future.

We are a socially responsible foundation that cares about reducing the negative environmental impact of companies but also of its products and services. We focus most on the SDG13, Climate Action and are specialized Carbon Offset Project Developers. Preconsu Foundation will implement its products and services in a socially responsible manner.

We will create new services for market segments to reduce the negative environmental impact of companies, such as in incentivizing residual material recycling, logistics, operative processes and to create green products. Furthermore, we are ensuring the establishment of prefab homes and offices with renewable energy.

At Preconsu Foundation, we have deliberately chosen to translate our experience in manufacturing prefab homes, offices and workspaces to other sectors and to a broader field of application. Our wide-ranging knowledge of materials, construction methods and finishing options makes us a versatile partner for anyone looking for quality prefab constructions.
